Execution-driven professional with a quick-learning mindset and a knack for simplifying complex systems to drive impact. I thrive in fast-paced environments, turning ambiguous problems into clear, actionable strategies that align technical capabilities with business goals. With an engineering foundation and a business lens, I translate insights into structured, metric-driven roadmaps. I focus on reducing friction between technical possibilities and market needs to build scalable products that deliver measurable outcomes.

EXPERIENCE

SuperAGI, Bangalore – *Associate Product Manager*

Nov. 2025 – Present

- Led 4 product verticals (Voice Agents, Dialer, AI Sales & Support, Forms), driving **0→1 development** for Voice Agents & Forms
- Drove \$30K+ ARR in 3 months** by taking products from launch to adoption
- Migrated **\$50K ARR** from mid-market clients (e.g., LeadSquared) to SuperAGI, improving product adoption
- Built and scaled the voice agent platform, unlocking new use cases through sales-driven iterations and feature development (automations, dynamic variables, custom GPTs)
- Built internal tools for product operations and rapid prototypes for client use cases (POS, ATS, ERP, etc), enabling feature experimentation, operational tracking and faster product decisions
- Worked directly with founders, shaping **product roadmap, GTM strategy & prioritization**

GoKiwi (Fintech), Bangalore – *Business Analyst*

Jul. 2025 – Nov. 2025

- Designed and automated credit risk signals using alternate data (SMS, Email) to **identify credit card revolvers**
- Reduced storage costs by 35%** by optimizing SQL engine performance (compression, distribution & sort keys)
- Accelerated funnel analytics by 30%** by building custom tables for end-to-end customer journey tracking across touchpoints
- Enabled **AI-driven analytics** by documenting core tables, defining funnel KPIs, and designing LLM-ready prompts
- Reduced marketing spend leakage by 10%** by redesigning attribution logic, eliminating double-counting and improving ROI accuracy
- Built scalable data pipelines (RDS → S3 → Redshift), improving data reliability and accessibility

Navi Technologies (Fintech), Bangalore – *Product Analyst Intern*

Nov. 2022 – Jun. 2023

- Designed and evaluated **A/B experiments**, defining hypotheses, sample sizes and success metrics to drive product decisions
- Improved agent productivity by 28%** by redesigning KPIs and recommending UI/UX changes to streamline workflows
- Built **self-serve analytics tools** (SQL + Tableau), significantly reducing RCA turnaround time for collections team
- Improved **CTR by 30 bps** by building a logic-based tracking system linking deep links to payment conversions
- Supported **CEO-level decision making** through high-impact analyses on funnels, segmentation and collections strategy

EDUCATION

SP Jain London School of Management, Singapore & London – *Masters in Global Business (Marketing)*

2023 – 2024

- Research:** “Adoption of Metaverse on E-commerce Platforms”

R.V. College of Engineering, Bangalore – *B.E. Computer Science Engineering*

2017 – 2021

SKILLS

Product & Business : Product Strategy | 0→1 Development | GTM Strategy | A/B Testing | Funnel Analytics

AI & Systems : LLM Prompting | AI Workflows | Voice Agents | Automation Systems | API Integrations | Rapid Prototyping

Data & Analytics : Advanced SQL | Data Modeling | Tableau | Advanced Excel

Soft Skills : Observant | Detail-Oriented | Problem Solving | Ownership | Organizational Skills | Creativity | Leadership

CERTIFICATIONS

Product Analytics Micro-Certification, Product Strategy Micro-Certification (*Product School, 2024*) | Data Analytics Course (*Skillo Villa, 2022*)

EXTRACURRICULAR

Organizer, Megatrek V2.0 2017, Rotaract Club, RVCE: Achieved the India Book of Records for “most people assembled for trekking at single place” | **Theatre/Street Plays:** Participated in more than 15 competitions across India
